

Description

Native status: Oklahoma

Straight species: Yes

WETLAND STATUS: Great Plains- No Indicator (NI)

*This plant doesn't spread aggressively.

Light Requirements- sun

Soil Moisture- dry, moist

Height-1'-3'

Bloom Time-August, September, October

Bloom Color- white

The preference is full sun and dry conditions; a little shade is tolerated. This plant prefers poor soil that and it can thrive on slopes. Its toleration of drought is better than most plants in the tallgrass prairie. The leaves may turn yellow and start to shrivel away toward the end of the year, but this is normal.
